

Why Benchmark Clinical EHR?

“Remote access to my patients’ records improves patient care and makes me more efficient. I would never consider going back to a world of paper charts.”

Craig Petry, MD
Wyndhurst Family Medicine

Electronic Health Records

Choosing an Electronic Health Records (EHR) system doesn’t have to be a difficult task. Benchmark Clinical EHR delivers the advanced functionality and flexibility you need coupled with superior support services to ensure your success.

As a fully-integrated EHR, Scheduling, Practice Management and Patient Portal solution, Benchmark Clinical gives you all the tools you need to increase revenue while improving patient care and productivity. You can see more patients, easily document interactions and access medical records, diagnostic data and more at the point of care. Expedite and track orders with Benchmark’s CPOE module by connecting to any lab, radiology, practice management or pharmacy system using our HL7 interface. Ensure compliance and continuity of care as Benchmark maintains and continually updates all major files, including ICD-9, CPT, drug and formulary data, national pharmacy lists, insurance company rules, Medicare fee tables and more. You can also take advantage into federal stimulus funds being offered to physicians who adopt an EHR system in accordance with the HITECH Act.

Best of all, Benchmark Clinical EHR does all of this without turning your practice inside out. You access information anytime, anywhere via the Web as Benchmark Clinical is browser-based, so there is no expensive hardware or software to install, update or maintain. The intuitive system is easy to use and, unlike most EHRs, is easily customizable by your medical staff. Because of our flexible architecture, you can modify and build templates “on the fly” and adjust styles to meet your individual needs and personal preferences.

When it comes to helping you achieve success, Benchmark Clinical EHR doesn’t stop at technology. We provide complete end-to-end implementation services and offer a variety of support and training options to ensure that your entire staff has the know-how and confidence to fully utilize your new EHR system.

Visit Benchmark-Systems.com for more information about Benchmark Clinical EHR and other healthcare solutions.

Rely on Benchmark Clinical EHR

Private practices, medical centers, hospitals and clinics rely on Benchmark Clinical EHR because it is:

CONVENIENT

As a Web-based system, you can retrieve patient information anywhere, any time and get one-click access to all of your charts in one place. A simple point and click touch-screen along with voice and handwriting recognition make data entry easy for everyone on your staff. Benchmark Clinical EHR also works with PC's, tablet PC's and handheld devices to help you document patient encounters at the point of care.

ACCURATE

Avoid inadvertent under-coding as the system automatically recommends the correct E&M codes, then sends ICD-9 and CPT codes directly to your billing system. Used with Benchmark Practice Management, our Clinical Billing Module averages a 98 percent first-pass claims acceptance. The system easily captures information for PQRI and Meaningful Use Reporting. You get direct access to the National Drug Database to track abuse and interactions. Health Maintenance Guidelines are at your fingertips to reduce medical errors and improve patient care.

FLEXIBLE

Unlike most EHRs, Benchmark Clinical adjusts to meet your practice needs and personal preferences.

Choose from templates or free flowing data entry designed and used by doctors in 120+ board certified specialties and subspecialties or modify our fully-customizable styles and even build templates on the fly.

RELIABLE

Benchmark maintains and continually updates all major files and key data, so you can be assured that the information you rely on is always accurate and up-to-date. Use the internal messaging system to keep everyone in the office on the same page and send patient information alerts. Accelerate care and information exchange by tracking and sending records to labs, pharmacies and referring doctors. Collaboration is easy as Benchmark Clinical EHR is compatible with many other healthcare systems.

SECURE

Patient and practice data are hosted at the largest secure database facility in the U.S., where confidentiality, integrity and availability of all systems is top priority. Benchmark Clinical EHR is CCHIT certified and HIPAA compliant with critical industry standards to protect your patients and your practice.

A Legacy of Success

Benchmark Clinical EHR was built leveraging over 30 years of expertise in helping healthcare providers lower costs while solving practice management issues. As a CCHIT certified vendor, Benchmark has the experience and expertise to help you significantly lower expenses while improving patient care with our flexible advanced technology and superior customer service. Visit benchmark-systems.com to learn more or contact us to join the thousands of physicians in over 120 specialties who use Benchmark's integrated solutions, including Benchmark Clinical EHR, every day.

Your patients and staff will love our patient portal:

Online or kiosk, patients and staff can:

- Complete new patient intake forms
- Request or check appointments
- Check lab results
- Request Prescription Refills
- View statements
