

Benchmark Practice Management

Why Benchmark for Practice Management?

"The speed and ease of use
of Benchmark is incredible.
We complete our accounts
receivable in record time."

Peggy Brewer
Fredicksburg Dermatologic

Practice Management

Here at Benchmark, we think Practice Management solutions should help you practice medicine – not just automate billing and claims management. That's why we've designed Benchmark Practice Management System to streamline workflow across your entire practice, improving front- and back-end office operations to reduce errors, improve patient care and boost revenue.

Moreover, we believe that you shouldn't have to alter your practice to incorporate new technology. Built on the strength of over 30 years of expertise in helping healthcare providers solve profitability and time management issues, Benchmark Practice Management actually adjusts to meet the demands of your practice and requires little change to your current workflow.

Utilizing both Internet connectivity and in-house software, Benchmark Practice Management is flexible, easy to use and affordable. You retain all of the time-tested reliability of the legacy systems you're currently using while expanding functionality with user-friendly tools that drive efficiency, hasten collections and help you expand your practice without adding additional staff.

With Benchmark Practice Management, you can meet the ever-evolving challenges facing healthcare providers today. Verify patient eligibility, submit insurance claims and check status in real-time to avoid coverage issues before they occur. Share critical healthcare data with patient-specific scanning and imaging and intra-office messaging. Streamline workflow with automated task management, paperless reporting and customizable forms, statement labels and screen templates.

While superior patient care is at the heart of your practice, proper accounting and cash flow are essential to its survival. Benchmark Practice Management's open-item accounting reduces A/R days, substantiates past claims, provides patients with detailed account statements and helps you justify the level of care you've provided. You'll experience a new level of financial visibility, operational efficiency and statistical management reporting that gives you the freedom to focus on your patients.

Rely on Benchmark Practice Management

Private practices, medical centers, hospitals and clinics rely on Benchmark Practice Management System because it:

STREAMLINES OPERATIONS

A complete Practice Management solution, Benchmark streamlines front- and back-office operations. Easy-to-use and accessible by everyone in your practice, the system lets you allocate critical resources, simplify scheduling, collect comprehensive data and securely store patient records on or off-site. Your entire staff can quickly minimize manual tasks and reduce paperwork headaches by automating workflows and increasing operational efficiencies. Benchmark Practice Management also integrates seamlessly with Benchmark Clinical EHR and our Advanced Scheduling and Virtual Practice modules for increased functionality.

SIMPLIFIES ACCOUNTING

Easily manage the financial aspects of your practice and boost your bottom line with Benchmark. Our Practice Management System has built in tools to help you swiftly manage transactions, submit insurance claims, post charges and automate billing

tasks. Real-time unpaid claims follow-up shortens A/R cycles and built-in audit trails detail patient communications for seven years. Efficient collection processes speed payment. Plus, our Billing Module averages a 98 percent first-pass claims acceptance.

DRIVES PRODUCTIVITY

Benchmark Practice Management puts the information you and your staff need directly at your fingertips so you can prioritize key activities, improve communication and free your staff from manual processes that slow your practice down. Code correctly and accurately. Send and store prescription requests. Scan and store insurance information and patient authorizations online. Date and time stamped messages, follow up reminders and a mail merge feature for collection letters free your staff from menial tasks to focus more on patients and building a stronger practice.

DELIVERS TRUE FLEXIBILITY

Unlike most Practice Management Systems, Benchmark Practice Management adjusts to meet your practice needs and personal preferences. Customizable work flow options ensure that the system adjusts to your unique practice and management style.

Get End-to-End Support & Training

When it comes to helping you achieve success, Benchmark doesn't stop at delivering advanced technology. We provide complete end-to-end implementation services and offer a variety of support and training options, including on-site, video and virtual training, to ensure that your entire staff has the know-how and confidence to fully utilize your Benchmark Practice Management System.

Experience a Legacy of Success

As a CCHIT certified vendor, Benchmark has the experience and expertise to help you significantly lower expenses while improving patient care with our flexible advanced technology and superior customer service. Visit Benchmark-Systems.com to learn more or contact us to join the thousands of physicians in over 120 specialties who use Benchmark's integrated solutions, including Benchmark Practice Management System, every day.
